Ultra Pelvic Support

For WAISTS

87% Emissivity

FAR-INFRARED (FIR) EFFECT

Experience a gentle, deep-seated warmth just by wearing, thanks to the phenomenal FIR effect.
** Note: Far-Infrared (FIR) is part of the solar spectrum, and the 5-14 micron wavelength band is often called 'Biological Energy Rays' for its beneficial effects on the body.**

MAX 55,000+ AVG 35,000+

HUGE NEGATIVE ION VOLUME

Over 10 types of natural minerals and rare earths, pulverized and sintered into powder, generate an astonishingly large volume of negative ions.
Includes: Dravite, Schorl, Apatite, Pegmatite, Tourmaline, Titanium, Zircon, etc.

HORMESIS

'Radiation Hormesis Effect' is the concept that faint trace levels of radiation emitted from specific minerals can activate biological functions and promote well-being.

The Cold

Period Cramps

Back Pain

Easy care: Machine washable in a mesh bag

Why It's So Warm

Over 10 types of CERAMIC POWDER applied directly to the fabric surface.

Traditional methods—weaving ceramic powder into the fibers—limit the amount of ceramic used, often resulting in insufficient effectiveness. This product shatters those limits through a specialized coating technology applied directly to the surface.

By significantly boosting the "heat-generating action" of far-infrared rays emitted from the ceramic powder, it delivers an extraordinary sensation of warmth.

Thermal Effectiveness Test

Surface body temperature increased by a remarkable 2.2°C.
